

Committed to delivering Services under a single
Umbrella for Any Office/Property

E-Waste Disposal & Recycling Management

Dear IT Heads and Facility/RE Heads,

We have some exciting news to share! We have started a new vertical that deals with the disposal and recycling of e-waste, taking a small step towards sustainability and environmental conservation. We will provide services:

- E-waste disposal and recycling
- Disposal of machines such as air conditioner scrap, refrigerator scrap, washing machine scrap, and TV scrap under the Extended Producer Responsibility (EPR) policy
- Disposal of oil scrap
- Disposal of hazardous waste such as foam, glass funnel, rubber, etc.

All our waste disposal and recycling processes comply with the Central Pollution Control Board (CPCB) Policy of India, and we will issue a valid certificate to the company.

You can fully trust Competent Support Advisors (CSA) to take care of all your e-waste disposal and recycling requirements without any doubt. Please get in touch with us to discuss your E-Waste/Waste Disposal requirement.

Best regards,

Team Competent Support Advisors (CSA)
